STORY

In the last episode Bomberman had defeated the "Five Bad Bombers" and had successfully defended the peace. But a new evil force was planning to disrupt the new found peace.

This new enemy was no other than "Professor Bugler", the creator of the "Five Bad Bombers". In order to carry out his plan to dominate the universe, "Professor Buglar" had repaired the "Five Bad Bombers" and was now about to invade the Bomber Nebula!

There are five planets in the Bomber Nebula and on each of these planets exists the mother computer of the United Planet Federation. These computers helped to keep peace and order through out the nebula, but the five main program chips of these computers were stolen and sealed in a control capsule by the "Five Bad Bombers"!

Unknown robots had also appeared and the functions of the five planets had completely stopped. In this time of emergency the United Planet Federation had called upon Bomberman to save the day. To save the Bomber Nebula, Bomberman's battles had begun again!
